

Vice President of South Europe and the Mediterranean Region
Report 2020

The situation in the Mediterranean area continues to be very complex. The situation in the Mediterranean area continues to be very complex. Almost all the countries of the south and south-east of the Mediterranean Sea are not suitable, in this historical phase, to create truly operational scientific societies.

However, during the International Conference on Teleneurorehabilitation (May 2019), a special meeting was organized for the participants from the Mediterranean area; a lot of interest emerged and, at the same time, a very low experience (with the exception of Italy and Spain). For this we have decided to organize a similar meeting in Tunisia in 2020. During the Congress of the Mediterranean Forum of Physical and Rehabilitation Medicine (November 2019) we planned the principal details of the Conference, but obviously this plan has not been realized.

Every activity was blocked in 2020.
