WFNR World Federation for Neurorehabilitation

Mentor Profile Template

Name: Nele Demeyere

Position: Associate professor (cognitive neuropsychology)

Affiliation: University of Oxford

Email: nele.demeyere@psy.ox.ac.uk

Introduction: (max 200 words)

I am an associate professor at the University of Oxford, where I head the Translational Neuropsychology research group. My lab's research is situated at the interface between cognitive neuropsychology and clinical practice in stroke.
My first undergraduate and masters degrees were in psychology and cognitive neurosciences at KULeuven (Belgium), followed by a PhD in neuropsychology at the University of Birmingham (2010) and postdoctoral positions at Birmingham and then Oxford.
In 2015, I received the Lord Leonard and Lady Estelle Wolfson Stroke Association lectureship award, starting my independent research group. I was then awarded the Stroke Association's Priority Programme Award in 2019 and I currently hold a senior NIHR advanced fellowship, allowing me to focus 100% of my time on research.

Scientific/Research and or clinical expertise and skills (50 words max)

My research spans the translational axis in neuropsychology: From fundamental cognitive neuropsychology, to clinical tool development for cognitive screening, and observational cohort studies capitalising on real-world clinical cohort data, including routinely acquired NHS brain scans. My biggest impact work so far has been the development of the Oxford Cognitive Screen.

Number of mentees I can take: 2

Frequency of Meeting: quarterly
